

Update: The Cell Culture Facility

The Cell Culture Facility now provides access to *Current Protocols in Molecular Biology* at <http://www.ccf.ucsf.edu>.

The classic “red book” *Current Protocols in Molecular Biology* is the authoritative source for researchers who need up-to-date protocols for their research. The cost of the institutional access license puts this resource out of reach of most labs. The CCF, partnering with Invitrogen, has added a “protocols” link on its website, which will direct the user to Invitrogen’s protocols website. This site features *Current Protocols* material, indicated by CP, as well as protocols developed by Invitrogen application scientists.

The CCF plans to continue to add content to the “Protocols” link. The goal of the CCF is to provide as much added value as possible for UCSF researchers, placing needed information and services together at one website. Please contact the Director, Dr. Linda M. Reilly (lreilly@ccf.ucsf.edu) with suggestions!
